### First Grade Bee Insect

Carpenter bees are solitary bees. They build nests just for themselves and only feed their own young. They get their name from their ability to drill through wood. Carpenter bee stingers are not barbed, so they are able to sting over and over again. Size: 1" Shape: Oval, bee shaped; Color: Blue-black; Legs: 6; Wings: Yes; Antenna: Yes; Common Name: Carpenter bee

### Bee Information for Kids: Bumblebee & Honey Bee Facts

The stinger comes out of the bee's body and stays in the victim, releasing new venom while also signaling to other bees to come and help. While bee stings can be painful, they aren't serious unless you are allergic to them. Quick Bee Facts. Bees have six legs and three parts to their body. There are over 20,000

First Grade Bee Insect Bumblebees are considered to be beneficial insects because they pollinate crops and plants. They are very social bees and live in large "families". Unlike honeybees, bumblebees can sting more than once because their stingers are smooth and do not get caught in the skin when they fly away.

Many people are afraid of bees because of their sting, but bees are actually very useful insects. They play a vital role in the plant life cycle by spreading pollen from flower to flower. Many crops depend on bees for fertilization. Bees also produce honey that people use for food and beeswax that is used in candles and other products.
