Advantages of VBScript The main advantage of using a VBScript is that you can display a variety of data in the combo box. It allows you to access the combo box's properties and links those directly to PLC tags instead of having a static combo box that displays the same thing all the time. It even allows you to change the length of the combo box.

SIMATIC HMI WinCC V7.2 - WinCC: Scripting (VBS, ANSI-C, VBA)
Btw, i dont even think the Public/Private keywords do anything in WinCC VBScript. I just add them to keep the code more understandable for myself. Ive kinda given up on this for now, as i'm working on a small project with not much VBScript (so all functions in one module is managable) and i was just not getting anywhere.

WinCC vbscript calling function from another module ...
In case you try to set the text of a Richtext Control with WinCC Advanced you'll get a VBScript runtime error (see attachment). So it's not possible to use this property in a VBScript. But setting the value of the Top or Left property is working fine.
